DETAILED ACTION

In response to the amendment filled on 10/06/2005, all the amendment have been entered and the action follows:

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

3. Claims 27-29, 31, 34, 36-40 are rejected under 35 U.S.C. 103(a) as being unpatentable over Feldman et al (US 4595289).

With respect to claims 27-29, 31, 34, 36-40 the rejections are maintained and incorporated herein by reference as set forth in the prior office action paper number 4. Furthermore, with respect to newly added limitation of "an optical system simulating ... exposure system", Feldman discloses the camera system "optical system" that is use to obtain the images of the mask "simulating" the object per the exposure conditions of said exposure system is read as images taken by the camera using the light reflected of the masks, as claimed.

4. Claims 32-33, 35, 43-50, 55 are rejected under 35 U.S.C. 103(a) as being unpatentable over Feldman et al (US 4595289) in view of Elyasaf et al (US 5892579).

With respect to claims 32-33, 35, 43-50, 55 the rejections are maintained and incorporated herein by reference as set forth in the prior office action paper number 4.

5. Claims 51 and 56 are rejected under 35 U.S.C. 103(a) as being unpatentable over Feldman et al (US 4595289) in view of Elyasaf et al (US 5892579) as applied to claim 50 above, and further in view of Feldman et al (US 6124924).

With respect to claims 51 and 56 the rejections are maintained and incorporated herein by reference as set forth in the prior office action paper number 4.

Allowable Subject Matter

6. Claims 30 and 52-54 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

7. Applicant's arguments filed 10/6/2005 have been fully considered but they are not persuasive.

Applicant also argues that the reference fails to disclose the aerial image of the reticle in reflected light is acquired is not taught by the reference Feldman '289 (see page 11 paragraph 2 of remarks). Examine respectfully disagrees with the applicant, the figure 4, shows that the photo detector 87 is place vertically above the mask to detect the light reflected from the mask thereby, acquiring the aerial images of the mask of the reflected light.
